Thursday May 17th 2018
10am – 4:30pm

The Management of Change in light of Big Data

The Naval Club, 38 Hill Street, Mayfair,
London W1J 5NS

Speakers

Ben Thornton, Director PwC HR Consulting Practice
Leads the HR Transformation proposition for PwC UK, including Technology

Professor Peter Saville, Chair 10x Psychology Limited
ex Saville Consulting; Saville & Holdsworth; NFER - Nelson.

Ben Thornton

Ben is a Director within the HR Consulting practice in London and advises clients on a range of workforce, HR operating model and HR technology selection and deployments issues. He leads both the HR Transformation proposition and a number of HR technology alliances for the UK firm. His focus at this session will be that business is facing continual disruption by economic, political, regulatory and technological change. These pressures are forcing organisations and business leaders to re-think, re-focus and re-invent their organisations in order to keep pace with shifting customer expectations whilst delivering business results.

In this interactive session Ben will share a number of recent PwC thought leadership papers including:

- Mega Trends - the 5 trends shaping modern life
- Workforce of the Future – thinking about how this uncertainty is impacting the world of work covering considerations of collectivism v individualism and business fragmentation v integration
- Power to Perform – the Human Capital priorities that are emerging

Ben will be discussing these themes, particularly some of the emerging technologies that are starting to re-shape people processes. This will be an interactive session with syndicate and open floor discussions to give an opportunity to discuss and address some of the key challenges that arise.

Professor Peter Saville - BA, MPhil, PhD, HonDrSc, FBPSS, C.Psychol, CSci, Academic FCIPD, Hon FBPSS, FISM, FRSA, FloD Chair.

Peter Saville will be speaking in an interactive session on past and current attempts in psychometrics to develop equations and algorithms to implement change and enhance prediction, performance and outcomes in psychology.

Peter will then consider the application of Big Data and present recent research on both intrinsic and extrinsic factors to improve performance of high level teams in education, the workplace and professional sport.
